Prepared from publicly accessible profile information and the research gathered in this conversation

Important instructions for the AI creating the resume

- Use only details clearly supported by the information below. Do not invent degrees, institutions, employment dates, job titles, awards, metrics, or certifications.
- Treat information described as 'reported', 'self-described', 'promotional', or 'to verify' as unconfirmed until Sumit Varma confirms it or supporting documents are supplied.
- The supplied LinkedIn URL is https://www.linkedin.com/in/sumit-varma. Full LinkedIn sections were not accessible during research, so this pack is not a complete extraction of that profile.
- Before producing a final resume, ask for missing employment history, education, contact details, skills, achievements, and preferred target role.
- Use a professional, ATS-friendly resume style. Do not include date of birth, parents' names, or other personal details unless the subject explicitly requests them.

Final note

The most important next step is to obtain the full LinkedIn Experience/Education sections and have Sumit Varma verify dates, titles, qualifications and outcome metrics before generating a final resume.
